

RUBCLEAN

MOLD CLEANING COMPOUND (RUBCLEAN)

- RUBCLEAN is a specially formulated compound for the cleaning of thermosetting transfer mold
- Air vents, cavities & mold surfaces cleaning in single step
- Eliminate melamine cleaning compound
- Prevent mold offset & dented problem caused by harder melamine mold cleaning compound

ELASTOWET

MOLD WETTING COMPOUND (ELASTOWET)

- ELASTOWET is a specially formulated compound for wetting and conditioning thermosetting transfer mold after mold cleaning.
- ELASTOWET has a good compatibility with Rubclean, mold cleaning rubber compound produced by Cape Technology, Malaysia
- Air vents, cavities & mold surfaces conditioning in single step
- Elastowet has excellent conditioning properties with a minimum shot of application

Advantages of using RUBCLEAN & ELASTOWET:

- Reduce mold void, incomplete fill & other rejects
- Cost Savings on overall mold cleaning materials & eliminate dummy frame usage
- Shorter mold cleaning time & productivity gain
- Compound strips cut to customers' required dimension
- Dimension: (100-400) X (10-80) X (3-10) mm
- Environmental friendly, using non hazardous ingredients
